

MenúdeHoy

PRESS RELEASE · 13 OCTOBER 2026

Menú de Hoy launches a Christmas section with the Christmas Eve, New Year's Eve and holiday menus of Mallorca's restaurants

Mallorca's free menú del día app, in three languages, already brings together almost 40 festive menus from 15 restaurants and more than 300 group menus

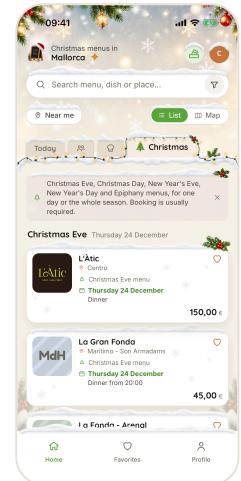

Palma, 13 October 2026. Where shall we have Christmas Eve dinner? And the office party? **Menú de Hoy** (menudehoy.app), the free, Mallorca-made app that brings together the set lunch menus of the island's bars and restaurants, today launches a new tab, **Christmas**, alongside its daily, group and tasting menus. It gathers the special menus for Christmas Eve, Christmas Day, New Year's Eve, New Year's Day and Epiphany, with their dishes and price per person.

The section starts with **almost 40 menus from 15 restaurants**, including the company lunches and dinners that venues prepare for the season, and will grow as restaurants publish theirs. At the end of the list come the app's other group menus, more than 300, for anyone looking for a celebration without a festive menu.

By day, price or party size. Just pick the date (Christmas Eve, Christmas Day, New Year's Eve or any day of the holidays) to see only what is served that day, and filter by price, area or group size. Every menu can also be seen on the map, saved to favourites and put to a vote with a WhatsApp poll, which everyone can vote in, whether or not they have the app.

For restaurants, free and in good time. A venue can publish its Christmas menu from the app itself or send it by email to hola@menudehoy.app, and with group menus it receives quote requests directly. Like the rest of the app, it is shown in Spanish, Catalan and English.

Less than six weeks after its launch, Menú de Hoy covers **more than 230 bars and restaurants**, from Palma to the Part Forana. Every weekday it publishes the menú del día of more than a hundred of them, plus more than 300 group menus at more than 85 venues and more than 50 tasting menus at 26.

"Christmas dinners are decided weeks in advance, and almost always by several people. Until now you had to go from restaurant to restaurant looking for each one's PDF. Now they are all in one place, you can compare them by day and price and send the group a poll to choose."

— Miguel Titos Ramis, creator of Menú de Hoy

Availability. Menú de Hoy is free, both for diners and for restaurants. It is on the **App Store** for iPhone and on **Google Play** for Android.

AT A GLANCE

What it is	Free app for Mallorca's menú del día, with group, tasting and, since 13 October, Christmas menus · Spanish, Catalan and English
